

■ Objective

Motivated Information Technology student with strong skills in programming, problem solving, and data analysis. Experienced in C, C++, SQL, and Python with hands-on projects in Machine Learning and Data Science. Seeking opportunities to apply analytical thinking and technical expertise to real-world problems.

■ Education

- B.Tech, Information Technology – Andhra University College of Engineering (2022–Present) | CGPA: 9.21
- Intermediate (MPC) – St. Joseph's College for Women (2020–2022) | Percentage: 88%
- 10th Standard – Siva Sivani High School (2011–2020) | CGPA: 10.0

■ Technical Skills

Languages: C, C++, SQL, Python

Data Science: Machine Learning, Data Cleaning, Feature Engineering, Regression Models

Core Concepts: OOP, DBMS, Data Structures & Algorithms

Tools: Git, GitHub, VS Code, Jupyter Notebook

■ Projects

Employee Salary Prediction (ML): Built regression model using Python, Pandas, Scikit-learn; performed feature engineering & visualization.

INTAL (Big Integer Library): Implemented arithmetic for 1000-digit integers in C.

ATM Simulation System: Console-based system in C++ with authentication, balance inquiry, withdrawal, deposit.

Kaggle Competitions: Titanic (Classification) – Logistic regression & ensemble methods; House Prices (Regression) – Feature engineering & predictive modeling.

■ Internships & Achievements

- Virtual Internship (Machine Learning) – EduNet Foundation (IBM supported)
- Oasis Infobyte – Web Development Internship (basic exposure, shifted focus to ML/Data Science)
- HackerRank: C++ (Rank: 152,542), Python Basics, SQL (Basic & Intermediate)
- Kaggle Badges: Titanic, House Prices
- Secured EAMCET Rank 10419
- School Olympiads (Problem-solving & analytical skills)

■ Extra-Curriculars

- Exploring AI & Data Science innovations
- Reading (Chetan Bhagat, Chitra Banerjee)
- Music enthusiast
